

YOUR HIGH **PRECISION MACHINING** PARTNER

Kantemir produces
individual plates and
turnkey mould bolsters
with a high level of accuracy.
Plates up to **2,000 x 1,000 mm**
Position and dimensional
tolerances 0.01 mm

TECHNOLOGY AND INNOVATION

Our CAM-R&D cluster ensures **off-line programming** and reliable **machining according to your data**. Each key stage of the production is carried out in a **temperature controlled environment**, with the **latest generation CNC machines**.

RELIABILITY AND PRECISION

Machining in full **compliance with your tolerances** ensures the perfect interchangeability of mould elements. We provide consistent **3D CMM** reports with our Zeiss measuring machine.

EXPERTISE AND RESPONSIVENESS

Our **automated production** facility operates a computer network that includes off-line programming, tools pre-setting, gun drilling, rough milling, surface grinding, finishing, and wire erosion.
